SXE
Mining license
opportunity

Notice to reader

Shakti Network will be a decentralized network, anticipated to be distributed evenly across the globe in proportion to the relative size of the local population. It will be a blockchain financial network that will be built, owned and operated by the mass population — a public blockchain developed by ordinary people for the benefit of the mass populace. This network will be one-hundred percent (100%) owned and operated by all participants, and its benefits will be derived by the participants with anticipated ninety-nine percent (99%) efficiency — merely one percent (1%) will be distributed to the IP Holders when earned.

The educational development of children is a primary motive and benefit anticipated from the Shakti Network. This world-wide initiative will be based on the recognition that the proper education of children lifts people out of the cycle of poverty. The monetary policy of the network — the creation of money and the purpose of that creation — will be derived through the efforts of ordinary children with the help of their parents and communities. Families will be encouraged to foster the educational development and the potential of their children on a daily basis by incentivizing them with Shakti Coins to be mined as a medium of exchange for active school participation.

This holistic approach seeks to ensure that there is sufficient motivation to fulfil the educational objective. Since Shakti's monetary policy will be shaped and influenced by the efforts of the mass population, it will be strikingly different from the current financial system. Shakti Network will be led under the watchful eyes of the Federal Government of the Swiss Confederation. Also, a US Compliance Office has been established with singular mandate to ensure active adherence to global Compliance at all times. The first successful creator of digital money — Bitcoin, Satoshi Nakamoto, set out the rules of engagement — that is, Shakti Network cannot be controlled or influenced by any government, any individual authorities or any powerful institution. That said, we (Shakti and its constituents) will endeavor not to break any existing laws, whether they are unjust or archaic, but will patiently work with lawmakers and other appropriate persons to change the laws. It is our strong belief that lawmakers will not impede on an ordinary person's just cause, because they too have children in their families.

The SXE Network will be created for us by "YOU", operated by us, and the benefits will be derived by all of us while seeking to obey the applicable laws of all nations — country-by-country. Indeed, SXE is intended to be a universal currency for the masses. So, get involved. Be inspired and inspire others. It's your chance to earn your fair share and be a transformative force in the world.

Swiss Shakti Foundation

Two Guys From The Milky Way

It's your moment to become the change you wish to see in the world

Create financial freedom by purchasing an exclusive Power Mining license before the launch phase — a remarkable product offered at this pivotal moment in the global economy.

EXCLUSIVE MINING LICENSE

The Swiss Shakti Foundation has delegated the authority to a United States Corporation to distribute a limited number of Licenses to build the Shakti Mining Network.

The US Corporation will distribute a limited number of one-time Mining Licenses, county-by-county based upon population distribution. This is a once-in-a-lifetime opportunity.

Once the Shakti website goes live, it will not be possible to obtain the Power Mining Licenses. So, don't miss out — act now to avoid disappointment!

A limited number of Mining Slots will be assigned during the pre-registration phase.

The Shakti Network is unique in its promise to bring opportunities to all — whether you're mining, verifying or paying with Shakti Coin.

In the pre-registration phase, there are a limited number of slots available per region for miners. We are doing this to ensure there is an even distribution of miners globally, and so that no single region or individual entity can monopolize the network's mining. It also ensures that each miner can make a sufficient income to remain motivated.

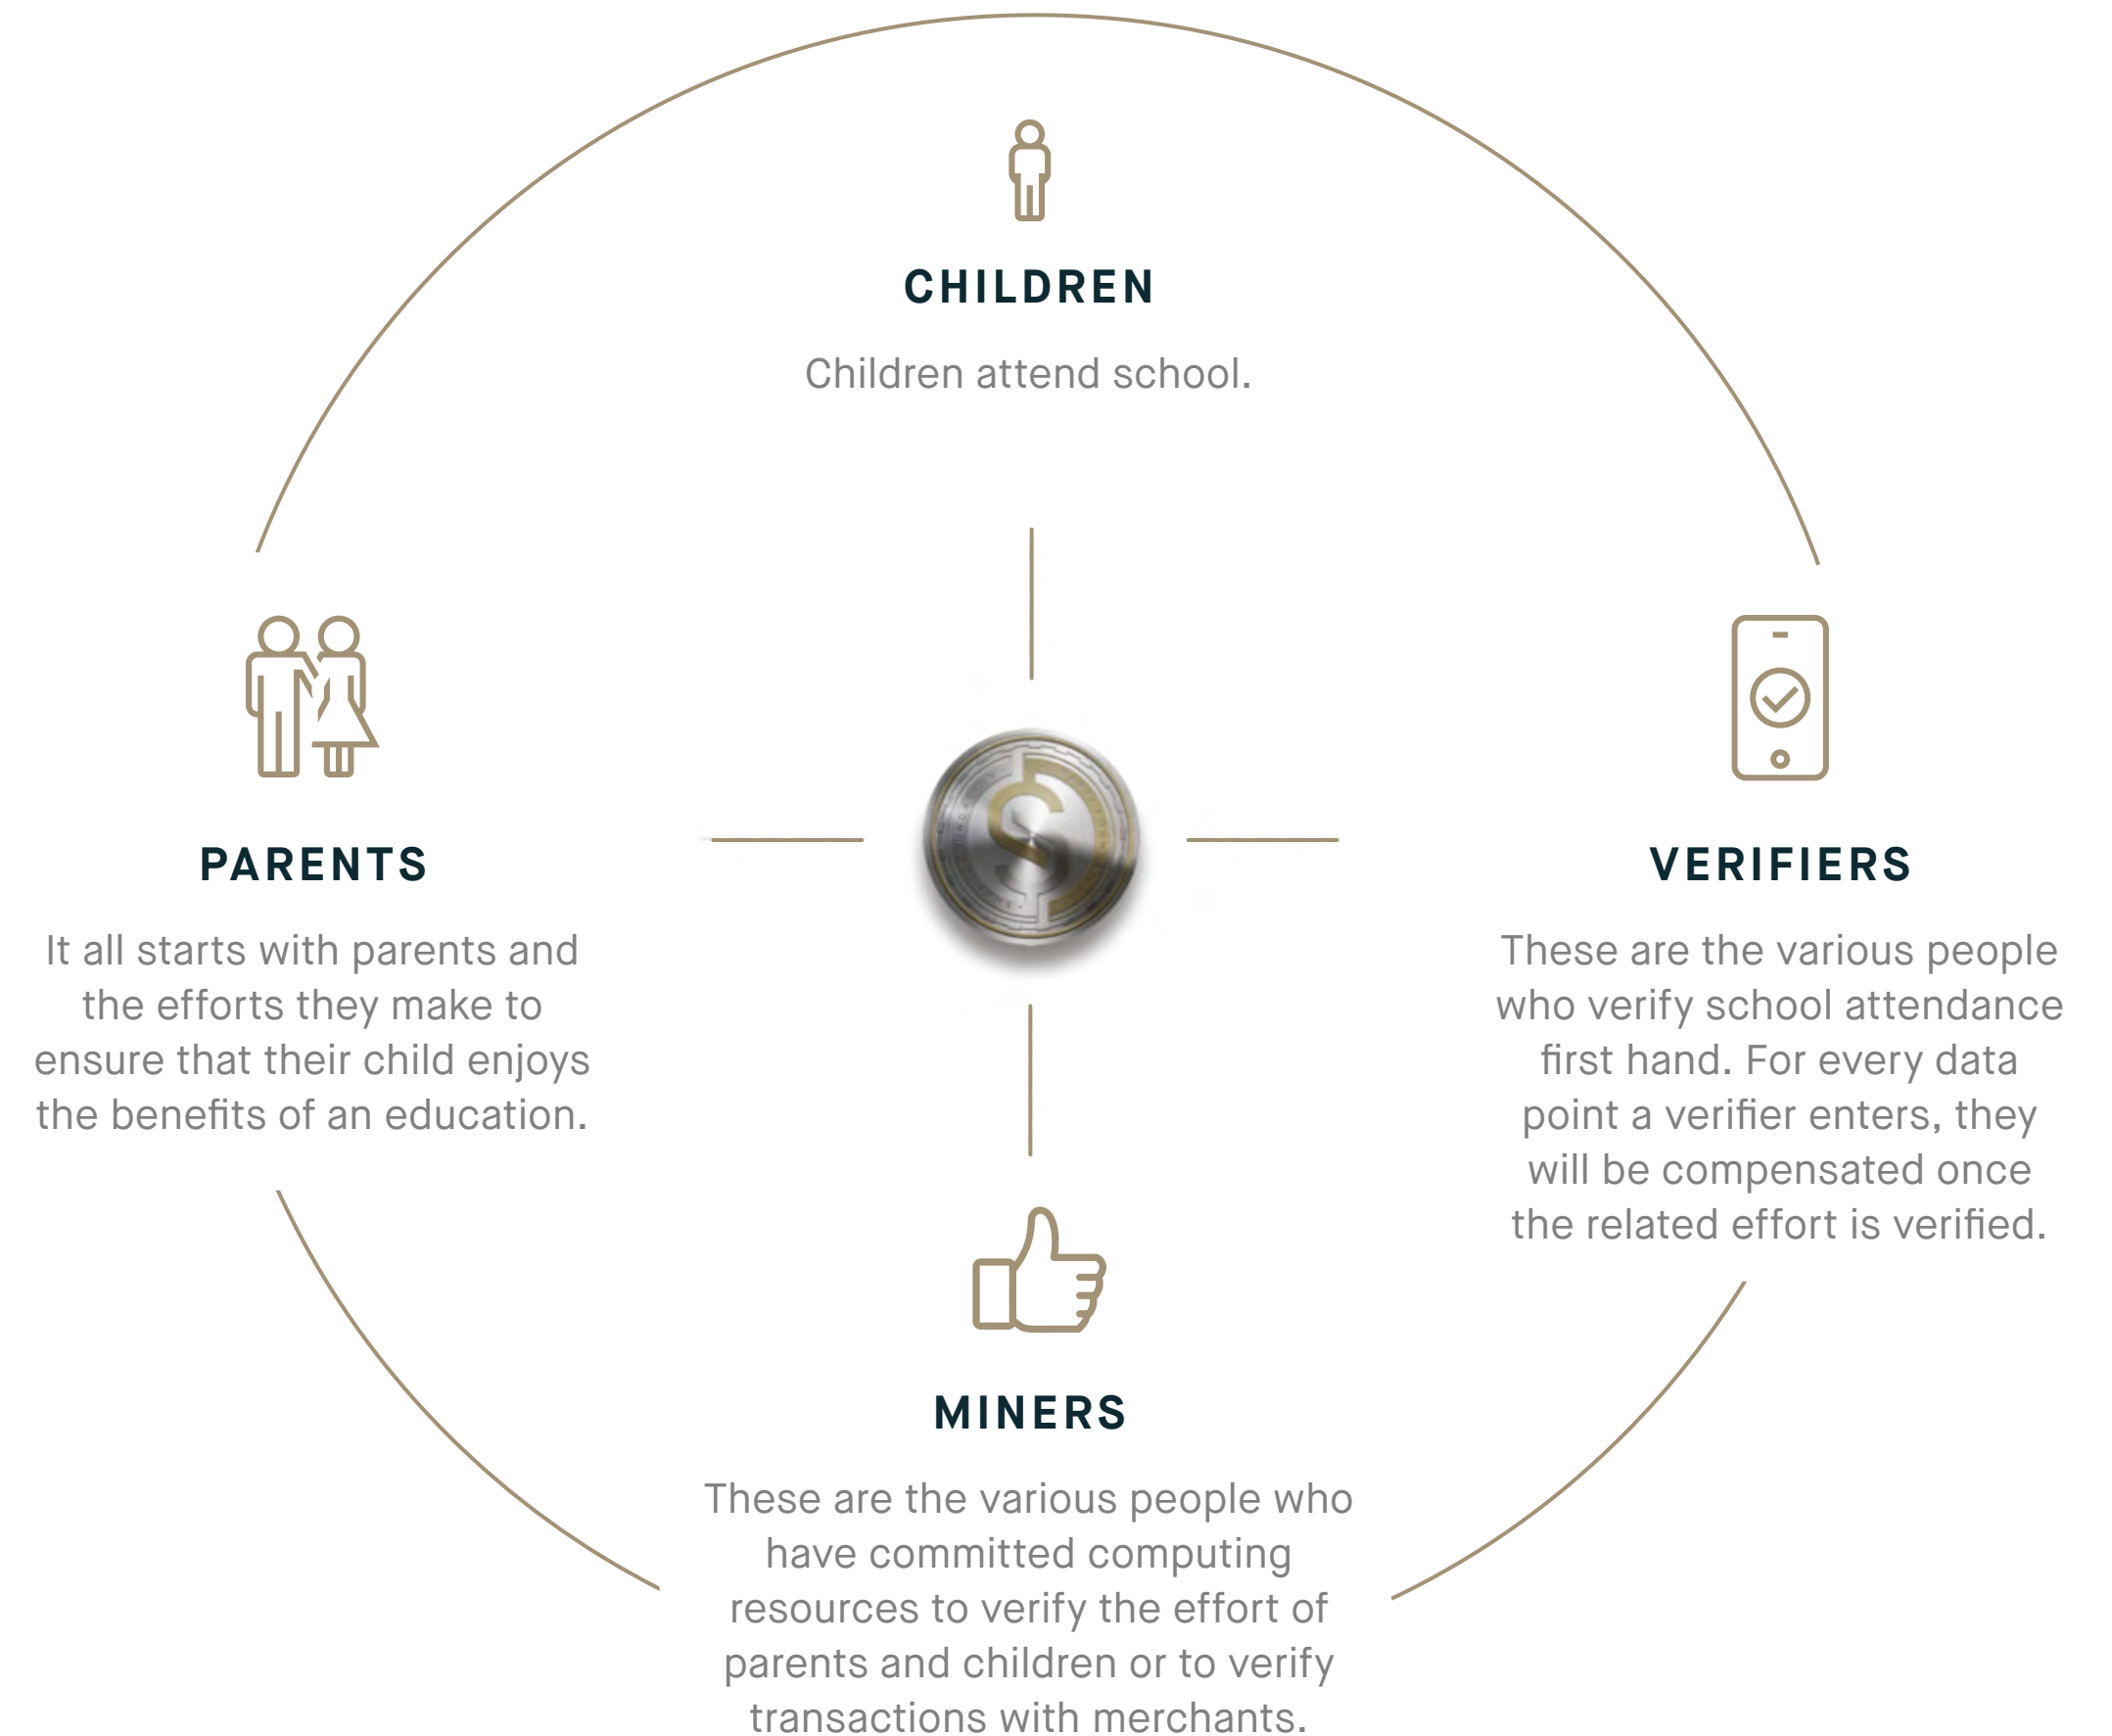

We are rewarding pre-registrants with the most lucrative mining slots in their community. To be eligible for these prime slots — and for a special pre-registration bounty promotion — you need to sign up now.

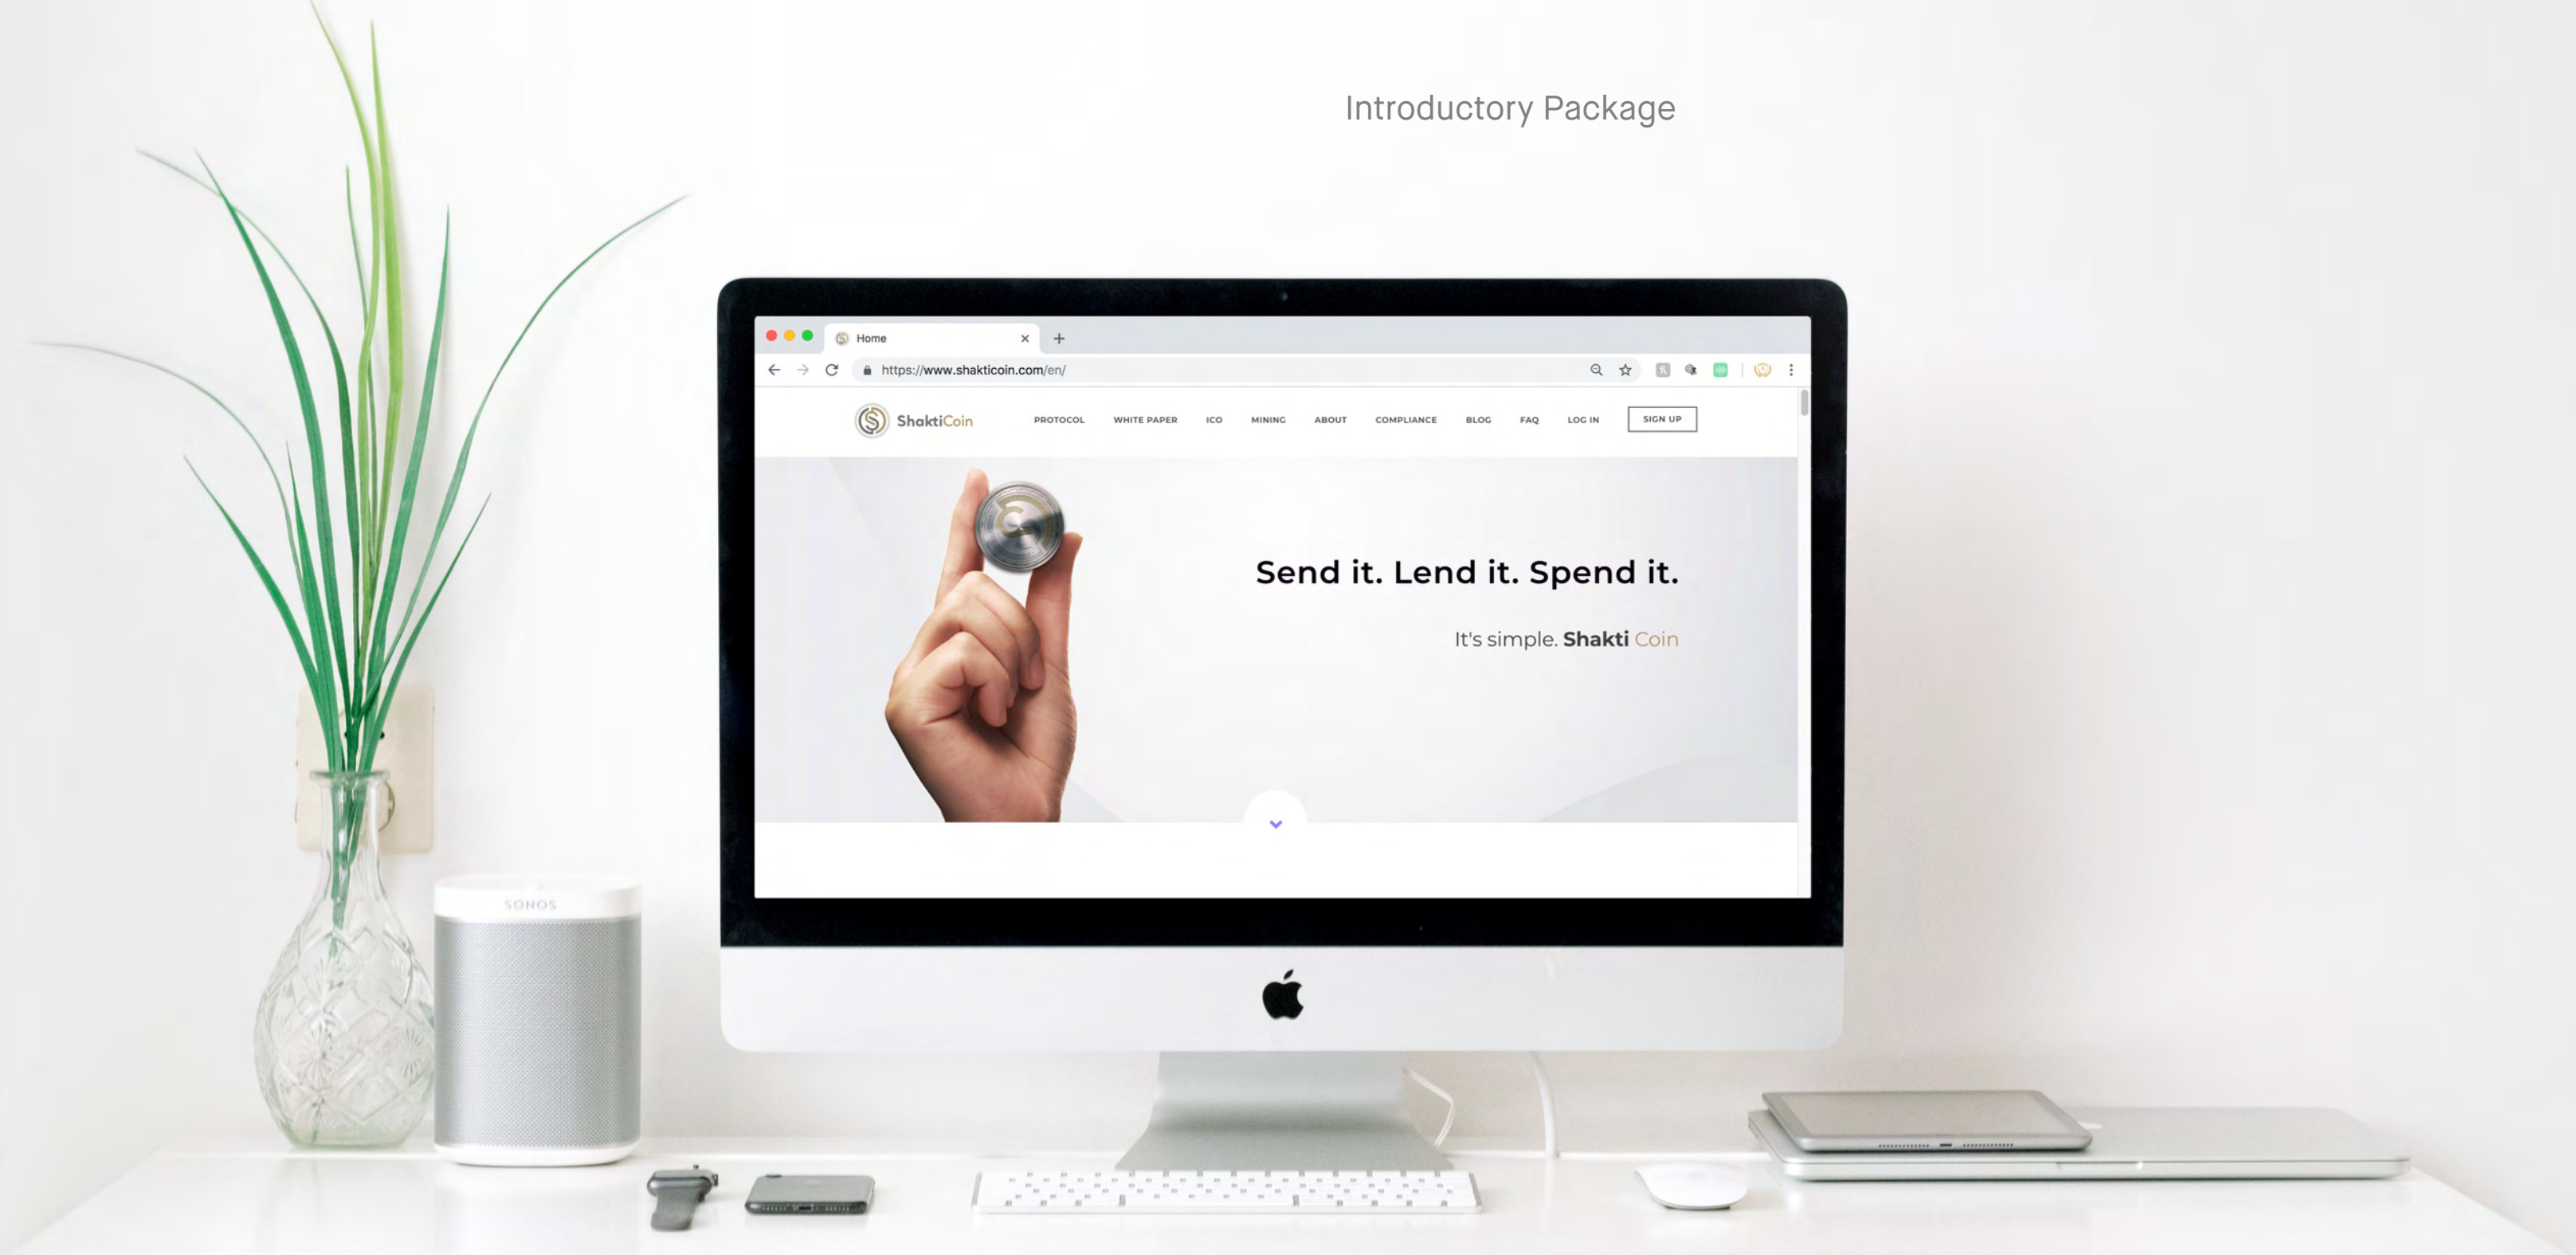

How to mine a Shakti Coin:

Unlike other cryptocurrencies, Shakti Coin is not mined through computational achievement, but rather through human achievement in the advancement of education.

It is a cooperative system where people pull together to support education in their community and stimulate their local economy in the process. Here are the four steps that are required to mine one Shakti Coin.

Exclusive Pre-Registration

The M101 License can be purchased at any time without any restrictions. However, the T-Series POWER Mining licenses are offered only during this exclusive pre-registration phase. Power Mining license holders can only mine from the Data Centers, i.e., T400 license holders are required to install a dedicated server within six (6) months of purchasing the license at the Tiered Certified Data Centers.

If you are new to mining, get started with the M101 License (\$49.95) and upgrade it later!

Shakti Coin introduces an entirely new concept in digital currency mining. It makes mining a cooperative effort accessible to all by leveling the playing field in every community.

Power Mining License: Comparison Chart 1/2

M101 Mining License

EXCLUSIVE OFFER

Bonus Bounty*
SXE 1,000
(US\$=5,000)

AT A GLANCE

License key is tied to individual Wallet.

Priority upgrade is only permitted to T100, when available.

RESTRICTIONS

Mine from comfort of your home.

No business registration required.

Widely available, oversold conditions may apply

POTENTIAL EARNINGS

Projected Earning Approx. USD \$1,000.00 per month.**

Three percent (3%) of the fees earned is paid to the Foundation to support its mandate.

ANNUAL FEE

USD \$49.95

[Mining Terms & Conditions](#)

Support:
24/7 chat & email support.

T100 Power Mining License

EXCLUSIVE OFFER

Bonus Bounty*
SXE 10,000
(US\$=50,000)

AT A GLANCE

Marketing support to develop the local community adoption.

Be among the first to claim exclusive, limited territory access.

Priority upgrade is only permitted to T200, when available.

RESTRICTIONS

Mine from Tier 1 certified Data Centers.

Data Center selection and territory is based on the first come, first-served basis.

Business Registration Required.

POTENTIAL EARNINGS

Projected Earning Approx. USD \$5,000.00 per month.**

Six percent (6%) of the fees earned is paid to the Foundation to support its mandate.

ANNUAL FEE

USD \$199.00

10-year License with renewal options.

Please note that you are only permitted to upgrade one level at a time.
So, if you want to maximize your earnings in the future, consider your entry point.

Earning potential for Mining License holders

Miners earn fees for validating transactions by installing SXE mining servers on the Shakti Network. For that service, miners earn fixed transaction fees.

A BIT OF THE TECHY STUFF

- Miners share a fixed transaction processing fee, and it is paid in Toshi -- a micro denomination of SXE.
- First, the miner who initiates the consensus earns 5% of the transaction fee.
- Second, the set of miners who confirm the consensus earns 85% of the transaction fees at the rate of 5 Toshi (0.00005 SXE or US 0.025 c), until the sum of the fees earned reaches 90% of the total.
- Finally, the remainder of the 10% of total fees is paid to the SXE Network to enforce Global Compliance and Shakti Network Monetary Protocol (SNMP) Policy and continue to further propagate the SXE monetary policy and promote Shakti Coin adoption globally.
- Any payment up to and including two (2) Shakti Coins is considered a micro-transaction. The Transaction processing cost for any micro-transaction is fixed at 500 Toshi (= US 2.5¢).

Earning potential for Mining License holders

- Although the SXE Network can scale transactions of more than 10,000 per second, the calculation shown below is for a network that is operating at 20% of its capacity.
- As and when the SXE network matures, Shakti miners with T400 Mining license will have the potential to earn up to US \$855 per day based on the key assumptions outlined below:

ASSUMPTIONS

1. The first set of miners who initiate consensus earn a fixed set of transaction fees.
2. The minimum fee earned for each consensus is 5 Toshi (= US 0.025¢).
3. Transaction costs are shared equally among the first consenting nodes.
4. Nodes are available 24 x 7 to accept network throughput.
5. Only earnings from the micro-transactions are taken into consideration for forecasting the projected income.
6. Micro-transactions are defined as any payment up to and including 2 SXE.
7. Only 5% of the global population will be assimilated into the SXE ecosystem, with the intent that distribution is as even as possible.
8. On average, an individual transacts three times a day.
9. SXE ledger reaches consensus every six seconds.

Software & hardware requirements

SOFTWARE REQUIREMENTS

The first release of the Shakti Mining application will support the following OS:

Windows: 64-bit Windows 7, 8, or 10.

Ubuntu: 64-bit Ubuntu 16.04 & 18.04.

Other Linux Distribution such as Debian, Red Hat, CentOS, Mint and other popular OS in due course.

HARDWARE REQUIREMENTS

Minimum: A dual-core Intel/AMD based system 1.2GHz with 2GB RAM and 500GB of storage.

Recommendation: A quad-core or greater Intel/AMD based system at 3.5GHz with 6GB RAM and 2TB of storage.

The Mining application may be provided for non-Intel/AMD platforms running a supported version of Linux at a later date. The hardware requirements may vary from the Intel/AMD specs mentioned.

ShaktiCoin

The earning forecasted for the holders of Mining licenses is presented here based solely on predictions, estimates or other information that be considered forward-looking. While these forward-looking forecasts represent our current judgment on the future, they are subject to risks and uncertainties that could cause results to differ materially.

You are cautioned not to place undue reliance on these forward-looking statements, which reflect our opinions only as of the date of this presentation. Please keep in mind that we are not obligating ourselves to revise or publicly release the results of any revision to these forward-looking statements in light of new information or future events that may occur.
